Yashwantrao Bhonsale
College of Pharmacy

About Institute

Yashwantrao Bhonsale College of Pharmacy (YBCP) is the first ever B. Pharmacy College in Sindhudurga District introducing pinnacle of excellence in pharma education and research since 2015. The courses started with, Bachelor of Pharmacy (2015) followed by D. Pharmacy (2018) and M. Pharmacy (2020).

The college of pharmacy is run in a spacious well equipped building of its own with library, hostel, mess, canteen, sports ground, ATM and transportation facilities. The pharmacy curriculum is approved by the Pharmacy Council of India (PCI), All India Council for Technical Education (AICTE), Directorate of Technical Education (DTE), University of Mumbai and Maharashtra State Board of Technical Education (MSBTE).

Research programmes are in progress in different pharma disciplines by the institute. Every year notable contributions are made in the research field by the institute.

As a part of University of Mumbai, National Service Scheme (NSS) and Department of Lifelong Learning and Extension (DLLE) awareness programmes are conducted regularly at various villages in the district. The institution conduct national seminars and guest lectures regularly on specific topics by inviting eminent speakers.

Today the college has taken a huge stride towards providing the advance technical education to each and every rural student of the region. The college has been successful in maintaining high level of research activities recognized at national level.

Mission Vision

Mission

Provide pharmacy education to our rural students that optimizes the health and wellness of individuals and communities.

Vision

1. Disseminate transformative pharmacy practice models through effective infrastructure and learnings.
2. Foster a culture of inclusivity that attracts and retains diverse student, faculty and staff
3. To enrich social values by being a torch- bearer of civility, diversity, and mutual respect in our vicinity
Photo of infrastructure.

Programme Educational Objectives

01. Professional Excellence

Our Graduates should be able to apply fundamental knowledge and technical skills in Pharmaceutical practices.

02. Research and Development

Our Graduates should be able to promote excellence in Pharmacy through research and development.

03. Entrepreneurship

Our graduates should be competent entrepreneur with leadership skill and comply with requirement of regulatory and legal system.

04. Life-long learning

Our Graduates should be able to exhibit professional behavior, ethical and environmental cognizance to attain life-long learning.

Programme Outcome

01. Pharmacy Knowledge

Possess knowledge and comprehension of the core and basic knowledge associated with the profession of pharmacy, including biomedical sciences; pharmaceutical sciences; behavioral, social, and administrative pharmacy sciences; and manufacturing practices.

02. Planning Abilities

Demonstrate effective planning abilities including time management, resource management, delegation skills and organizational skills. Develop and implement plans and organize work to meet deadlines. requirement of regulatory and legal system.

Programme Outcome

03. Problem analysis

Utilize the principles of scientific enquiry, thinking analytically, clearly and critically, while solving problems and making decisions during daily practice.

Find, analyze, evaluate and apply information systematically and shall make defensible decisions.

04. Modern tool usage

Learn, select, and apply appropriate methods and procedures, resources, and modern pharmacy-related computing tools with an understanding of the limitations.

05. Leadership skills

Understand and consider the human reaction to change, motivation issues, leadership and team-building when planning changes required for fulfillment of practice, professional and societal responsibilities. Assume participatory roles as responsible citizens or leadership roles when appropriate to facilitate improvement in health and wellbeing.

06. Professional Identity

Understand, analyze and communicate the value of their professional roles in society (e.g. health care professionals, promoters of health, educators, managers, employers, employees).

07. Environment and sustainability

Understand the impact of the professional pharmacy solutions in societal and environmental contexts, and demonstrate the knowledge of and need for sustainable developments.

Programme Outcome

08. Pharmaceutical Ethics

Honour personal values and apply ethical principles in professional and social contexts. Demonstrate behavior that recognizes cultural and personal variability in values, communication and lifestyles. Use ethical frameworks; apply ethical principles while making decisions and take responsibility for the outcomes associated with the decisions.

09. Communication

Communicate effectively with the pharmacy community and with society at large, such as, being able to comprehend and write effective reports, make effective presentations and documentation, and give and receive clear instructions.

10. The Pharmacist and society

Apply reasoning informed by the contextual knowledge to assess societal, health, safety and legal issues and the consequent responsibilities relevant to the professional pharmacy practice.

11. Life-long learning

Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change. Self assess and use feedback effectively from others to identify learning needs and to satisfy these needs on an ongoing basis.

Exe. Chairman's Message

Hon'ble. Mr. Achyut K. Sawantbhonsale
Exe. Chairman
Shri Yashwantrao Bhonsale Education Society

I am immensely happy to know that the Yashwantrao Bhonsale College of Pharmacy releasing it's third issue of Annual College Magazine "PHARMANKUR" I hope this magazine will provide students a canvass to express new dimensions of their talents and abilities. The magazine shall reflect the literary and creative talents and abilities of students and faculty. I Congratulate the college magazine team for bringing out this magazine and wish Success to all the students and faculty for their efforts to make this creative medium.

Chairman's Message

Hon. Adv. Asmita A. Sawantbhonsale

Chairman

Shri Yashwantrao Bhonsale Education Society

I am glad to know that the Yashwantrao Bhonsale College of Pharmacy publishing its third issue of Annual College Magazine "PHARMANKUR" depicting all important events / activities including cultural, literary, sports....etc. conducted by the aforesaid institute. I hope the publication of this Annual Magazine certainly provides an effective interface for projecting the literary skills of the students and faculty alike. I Heartily Congratulate the college magazine team for bringing out the Annual Magazine and convey my best wishes to the principal, students, faculty and YBCP staff in their future endeavors.

Secretary Message

Hon. Mr. Sanjeev I. Desai
Secretary
Shri Yashwantrao Bhonsale Education Society

I am pleased to know that Yashwantrao Bhonsale College of Pharmacy is bringing out its third issue of Annual College Magazine "PHARMANKUR". This magazine has brought the students and teachers on a common platform to share and display their ideas and imagination. The efforts taken to bring about innovative content is appreciable. I wish them all the very best for their future endeavors and career ahead.

Administrative Message

Hon. Mrs. Sunetra K. Phatak
Administrative Co-ordinator
Shri Yashwantrao Bhonsale Education Society

It is indeed a happy moment for us, as the YBCP is ready to publish its third edition of Annual College Magazine "PHARMANKUR". The most important aspect we could derive from this effort is that it brings out the various technical and analytical skills of the budding pharmacists. I appreciate the coordination and efforts of the team to bring out this issue. I wish them all the best for releasing more such magazine editions in future too.

Principal Message

Dr. Vijay A. Jagtap
M.Pharm, Ph.D.

Yashwantrao Bhonsale College of Pharmacy

It gives me an immense pleasure to inform you all that Yashwantrao Bhonsale college of Pharmacy is publishing its 3rd annual college magazine.

Today, the role of a college is not only to pursue academic excellence but also to motivate and empower its students to be lifelong learners, critical thinkers, and productive members of an ever-changing global society. Four years back, Yashwantrao bhonsale college of Pharmacy (YBCP) pledged to transform education. At YBCP we provide an atmosphere to our students for multifaceted development, where students are encouraged to channelize their potential in the pursuit of excellence. This can only be possible in a holistic, student-centric environment. The talents, skills, and abilities of each student need to be identified, nurtured, and encouraged so that he / she is able to reach greater heights. Students need to be provided with a platform to think, express, and exhibit their skills. It is necessary to empower them to negotiate several issues that confront them, with the teacher being a facilitator. The college is striving hard to make the best possible efforts to inculcate strong values combining with academics and extra-curricular activities in the students. Converting every individual into a self-reliant and independent citizen, the college provides an amalgam of scholastic and co-scholastic activities. No wonder, a student harnessed in such an atmosphere has every hope and possibility of becoming a responsible, balanced and a mature adult and is able to live in to contribute and to shoulder responsibilities of the society, of which he forms an integral part.

I am confident enough that the ybcpians will make themselves stronger day by day, adding a new leaf to the grandeur of the college.

I wish you all Happy reading!!!

Editor's Desk

Annual Magazine

Editor's Desk

Ms. Pranali V. Joshi

Mr. Mahadev H. Parab

Ms. Aishwarya L. Thakur

The Editorial Board of the Institute would proudly like to present its unique creation in the form of the Annual Magazine "PHARMANKUR" every year which serves as a platform to highlight the literary and artistic segment of the YBCP family.

A college magazine is a mirror of the college life. "PHARMANKUR" displays the colors of fun, excitement and hard work displayed by our students and staff ranging from academics, research, cultural and other extracurricular activities.

Students exhibited excessive enthusiasm and broadly participated in various programs that were organized round the year. We witnessed unmatched potential and talent from all the students and all the events were very well handled by the respective committees.

We are pleased to bring out this edition of our annual college magazine and hope that all of you would like it.

Finally, we would like to thank our Hon. Management members of "Bhonsale Knowledge City" and also our Principal Dr. Vijay Jagtap sir for their valuable guidance and support. We would also like to thank each and every member who contributed in this journey in any possible way.

We wish a very Happy and Calm Reading to all.....

Real Heroes

REAL HEROES

When I was a kid, my image of a hero was largely inspired by superman comics. A 'hero' was somebody who had supernatural powers like flying, laser vision or the strength to bend steel. Hero represent the best of who we can be. Their efforts to solve the world's challenges demonstrate our values as a society and they serve as powerful examples of how to make a positive difference in the world and how they can inspire others to do something heroic too.

The covid-19 pandemic has created unprecedented health and economic challenges among us. The situation around us changed the definition of real hero. Healthcare workers, scientists, firefighters, grocery store workers, aid workers, vaccine trial participants and ordinary citizens caring for their neighbors are actual heroes in real life.

We really can't see God, but we can define the power of God with several definitions. One among those is "the force that can do and undo anything, who is final decision maker". He blesses by sending messengers to help us. He created Mother to look after us. He created Father to take our responsibility. He created Teacher to guide us. He created a Doctor to serve his creatures and to heal from pain. Doctors are living Gods. Their profession is one of the most sacred profession in the world, because the facts that besides God, if somebody can serve the mankind from suffering and sickness and can give life, it is the 'Doctor'.

During this pandemic situation, we see the real heroes. All health care workers are the real heroes who have gone beyond the call of duty for their patients and putting their own lives at stake. Last but not the least, the people are the heroes who are practicing social distancing and staying indoors so that the rapid spread of virus can be controlled.

REAL HEROES

After witnessing these selfless services, every person would agree that our heroes are not those who jump floors on our screens but those who get out of their protective shelters to provide us with vegetables and groceries. Our heroes are not the ones who have super powers but the ones who are out there helping us during pandemic outbreak. All doctors, nurses, delivery boys and all medical professionals, police, essential service workers, farmers are our real Heroes who shaped the world. I salute all these super heroes.

Ms. Aalisha Sanjiv Rane
S.Y.D. Pharmacy

AYURVEDIC PHARMACEUTICALS & THEIR BENEFITS

Ayurveda is an alternative medicine system with historical roots in the Indian subcontinent. The theory and practice of Ayurveda is pseudoscientific. The main classical Ayurveda texts begin with accounts of the transmission of medical knowledge from gods to sages and then human physicians. In Sushruta Samhita, Sushruta wrote that Dhanvantari is Hindu god of Ayurveda.

Ayurveda mainly consists of plant based treatments which derived from roots, leaves, fruits, bark, seeds, such as cardamom and Cinnamon. Consumption of minerals, like sulphur, arsenic, lead, copper sulphate, zinc, gold are also prescribed. The addition of minerals to herbal medicine is called rasa shastra.

Some medications used to beat the disease:

- 1) Tulsi (*Ocimum tenuiflorum*) : Immunity Booster.
- 2) Neem (*Azadirachta indica*) : Blood Purifier, Immunity Booster etc.
- 3) Honey : It used to heal wound & electrolytes replenisher in Ayurveda (*Brugrut Samhita*)
- 4) Guduchi (*Tinospora cordifolia*) : It used in increases the immunity and boost the liver functions.
- 5) Saptarangi (*Salacia oblonga*) : It is used as blood sugar decreaser & anticarcenogenic properties.
- 6) Copper : It is used as cell regeneration, antiseptic properties.
- 7) Jasta (zinc) : It is used as antiseptic, coagulant properties. etc.

Generation Gap

GENERATION GAP

Generation gap is a term given to the age difference between two sets of people the young people and their elders especially between children and their parents. Everything is influenced with the change of time-age, the culture and mannerism. These changes affect everyone. Generation gap is an endless social phenomenon. Every generation lives at certain time under certain circumstances and conditions. So all generation have their own set of values and views. Every generation wants to uphold the principles they believe in. This is a problem that has continued for ages.

People born in different time periods under different conditions have their own views based on the circumstances they have been through. The patterns of the life have been changing continuously according to the time. Everyone wants to live and behave in his own way and no one wants to compromise with his/her values and views. There has always been a difference in attitude or lack of understanding between the younger and older generations. This gap now has started impacting our lives in a wrong way.

It is always good to have a wide range of ideas, views and opinions. It indicates how we are developing and advancing but sometimes this becomes worrisome when the views and ideas are not accepted by both the generation. Parents want to bring up their children with values that they have been brought up with and expect their children to follow the same.

Children on the other hand have broader outlook and refuse to accept the traditional ways. They want to do things in their own ways and don't like going by any rulebook. They are desperately searching for self-identify. - parent at time fails to understand the demands of this fast paced world. Consequently there is a lack of communication and giving up on relationships.

Generation Gap

GENERATION GAP

It is time to realize that neither is completely right nor wrong. Both the generations have to develop more understanding and acceptance for each other. Having a dialogue with each other calmly with the idea of sorting out conflict in ideas, changing their mindset for each other this can be helpful in bridging the gap between the two generations.

Spending more time with each other like family outings, vacations could be some effective ways to build up a strong bond with each other. Both the generations need to study the ways of the society during their growing period and have mutual respect for it.

Generation gap occurs because society is constantly changing. It is the responsibility of both the generations to fill this gap with love, affection and trust. Both the generations should have mutual respect for the views and opinions that they uphold and advance cautiously with the development of the society.

Alexander Fleming

ALEXANDER FLEMING DISCOVERY OF PENICILLIN

Penicillin heralded the dawn of the antibiotic age. Before its introduction there was no effective treatment for infection such as Pneumonia, Gonorrhea or Rheumatic fever. Hospitals were full of people with blood poisoning contracted from a cut or a scratch, and doctors could do little for them but wait and hope.

Antibiotics are compounds produced by Bacteria and Fungi which are capable of killing, or inhibiting, competing microbial species. This phenomenon has long been known; it may explain why the ancient Egyptians had the practice of applying a poultice of moldy bread to infected wounds. But it was not until 1928 that Penicillin, the first true antibiotic, was discovered by **Alexander Fleming, Professor of Bacteriology** at St. Mary's Hospital in London.

Fleming found that his "mold juice" was capable of killing a wide range of harmful bacteria, such as Streptococcus, Meningococcal and the diphtheria bacillus. He then set his assistants, Stuart Craddock and Frederick Ridley, the difficult task of isolating pure penicillin from the mold juice. It proved to be very unstable, and they were only able to prepare solutions of crude material to work with. Fleming published his findings in the British Journal of Experimental Pathology in June 1929, with only a passing reference to penicillin's potential therapeutic benefits. At this stage it looked as if its main application would be isolating penicillin insensitive bacteria from penicillin-sensitive bacteria in a mixed culture. This at least was of practical benefit to bacteriologist, and kept interest in penicillin going. Others, including **Harold Raistrick, Professor of Biochemistry** at the London School of Hygiene and Tropical Medicine, tried to purify penicillin but failed.

Alexander Fleming

ALEXANDER FLEMING DISCOVERY OF PENICILLIN

The term "Penicillin" is often used generally to refer to benzyl penicillin (penicillin G, the original penicillin found in 1928), procaine benzyl penicillin (procaine penicillin), benzathine benzyl penicillin (benzathine penicillin), and phenoxymethylpenicillin (penicillin V). Procaine penicillin and benzathine penicillin have the same antibacterial activity as benzyl penicillin but act for a longer period of time. Phenoxymethylpenicillin is less active against gram-negative bacteria than benzyl penicillin. Benzyl penicillin, procaine penicillin and benzathine penicillin can be given by intravenous or intramuscular injection, but phenoxymethylpenicillin can be given by mouth because of its acidic stability.

Mr. Hrishikesh Shrikant Kamble.

BE YOURSELF !

Be the best version of yourself because no one is going to play your role better than you. Life gives you many chances it's your choice to create something great or achieve something big in life.

Be Yourself!

Don't only dream for your goal give your 100 % to achieve it. Some may distract you some may make you feel uncomfortable but you should be stronger. Remember one thing in life that success never comes overnight you have to try hard for your achievements. Never copy others choice, create your own path because legends never copied they create their own path.

Be the One!

A failure gives you new chances for tomorrow. Great things take time. Never compare yourself with others because everyone has a different role in their own life. Time is more precious it doesn't stop for anyone so doesn't waste your time, everyday is a new opportunity. Always bounce back stronger to your failures. There is never ever last chance in life.

Be brave!

**"DREAMS ARE EASY TO IMAGINE BUT IF YOU BELIEVE
IN YOURSELF
YOU WILL ACHIEVE IT ONE DAY"**

Mr. Md Saad Golandaj

Female Foeticide

FEMALE FOETICIDE

Today there is huge reduction in the number of women in comparison to the man. And it is only because of increasing crimes. Female foeticide is the elimination of girl child after sex determination test from the womb.

People believe that boys are the key to continue their family. According to our society girl means nothing. People usually think that boys are better performers. The girls are treated very badly and are discriminated almost in every house.

Female foeticide is an unethical act which has been practiced from old age. It's a big crime and there should be legal stoppage to control over it. Don't underestimate the power of girls. Respect her and stop this crime.

'SAVE GIRL CHILD'

Akanksha Kudtarkar

Corona Virus

CORONAVIRUS

Novel corona virus this is a virus that cannot be seen with open eyes. It is a micro virus that has never been seen before. This virus is commonly called as Covid -19. It is a contagious disease. First, the virus infection began in December 2019 in Wuhan, China. The World Health Organization (WHO) has declared the virus on epidemic. To date more than a million people worldwide have died from these Covid - 19 infections. No drug or vaccine has yet been developed to eradicate the disease. Research is being done to make a vaccine and drug worldwide to cure the disease completely.

How does Covid-19 spread?

Covid-19 is a contagious disease that spread rapidly. The disease spread rapidly from corona infected person to many people. The disease is spread in close contact with the corona infected person or due to drops arising from his cough or sneeze. So it spread rapidly to other individuals.

Symptoms

Early symptoms of the disease are common but these symptoms can be life threatening. Fever, dry cough and shortness of breath are symptoms of corona infection. Subsequently, the diseases affects the entire human body and thus endanger the life of the person.

Corona Virus

corona Virus

Prevention of Covid-19

We can take the following measures to prevent corona virus.

1. We need to use regular masks.
2. Washing hand regularly with soap or sanitizer.
3. Avoid visiting public places when not needed.
4. Keep a distance of at least 2 meters in public places.
5. Without washing hand, we have to avoid putting hands on our face again and again.
6. Handkerchief should be used while coughing or sneezing.

In this way if we take care of ourselves and our family then we can definitely protect ourselves and our family from corona and prevent the increasing infection of Covid-19.

आनंदाचे अर्थकारण

कणभर गोष्टीत लपलं असत, फक्त ते मणभर जगता यायला हवं.
'तुम्ही ज्या गोष्टीचा विचार करता, जे बोलता आणि जे करता त्यामध्ये सामजस्य असेल तरच तुम्हाला आनंद मिळेल- महात्मा गांधी

प्रत्येक क्षण रसरसून जगायचा ठरवला तर खरोखर तसा छान अनुभव यायला लागतो. सकाळी उठल्याबरोबर, डोळे उघडले की आजूबाजूला जे जे म्हणून दिसेल, सजीव, निर्जीव वस्तू, परिसर त्याला मनातल्या मनात 'गुड मॉर्निंग' म्हणायचं. असं जाणिवपूर्वक करणं गरजेचं आहे. उठल्यापासूनच सकारात्मक विचार करायला सुरुवात करायची. मग दिवसभरात कशीही परिस्थिती, आव्हानं समोर असो. आत्ता 'या' क्षणांतला आनंद टिपायचा. म्हणजे माइंडफुल' राहायचं. तो क्षण जगायचा. आनंदी राहणं ही एक कला आहे. मुख्य म्हणजे ज्या गोष्टींमुळे, व्यक्तींमुळे, क्षणांमुळे आनंद मिळतोय त्या प्रत्येकाबद्दल कृतज्ञ राहायचं.

नेहमी आनंदी व्हायचं आणि राहायचं असेल, खऱ्या अर्थाने समाधानी व्हायचं असेल तर मनात काही बीजं पेरायला हवीत. सकारात्मक विचारसरणी नुसता सकारात्मक विचार करून अमलात आणता येत नाही. कारण मग ती फार काळ टिकत नाही त्यासाठी आपल्या आत काही गुणवत्ता निर्माण करायला हव्यात. त्यातली पहिली गुणवत्ता म्हणजे कृतज्ञता. कृतज्ञतेची भावना अंतःकरणात रुजवायची असेल तर आपल्याला प्रथम आत्ता या क्षणी घडत असलेल्या सकारात्मक गोष्टीवर लक्ष केंद्रित करायला हवं. फोकस करायला हवं. आणि नकारात्मक गोष्टी दुर्लक्षित करायला हव्यात. म्हणजेच ग्लास अर्धा भरलेला आहे यावर लक्ष द्यायला हवं. अर्धा रिकामा आहे याकडे दुर्लक्ष करायला हवं. आजकाल 'लर्निंग' आणि 'अर्निंग' यांच्या मागे आपण धावत असतो पण 'लिव्हिंग' विसरलो आहोत. मूळ गोष्ट वय नाही. आयुष्य जगणं ही गोष्ट महत्त्वाची आहे. कोण किती चांगलं, बुद्धिमत्तेने जगतं याला महत्त्व आहे. फक्त श्वास घेणं म्हणजे आयुष्य जगणं नव्हे. श्वासाला सुगंधित करून जगणं म्हणजे आयुष्य जगणं होय.

आपल्याला शेवटच्या क्षणांत आयुष्याभर जे काही कमावलं ते परिवाराकडे सोपवून, शरीर स्मशानात नष्ट होऊन आपल्याला या जगाचा निरोप घ्यायचाच आहे हे सत्य आहे. जर हे वास्तव निरंतर आपण समोर ठेवलं तेव्हाच जगण्याचा खरा आनंद उपभोगता येईल. तेव्हाच शरीरात रोग-व्याधी उत्पन्न होणार नाही किंवा मनाला पापी विचारांचा स्पर्श होणार नाही आणि त्याचवेळी संपत्तीचा दुरुपयोगही होणार नाही.

जीवनात दोन गोष्टी, वाया जाऊ घ्यायच्या नाहीत..

अन्नाचाकण, आणि आनंदाचा क्षण..

नेहमी हसत रहा.....

Ayurvedic Herb: Gokhru

OVERVIEW OF AN INDIAN AYURVEDIC HERB: GOKHRU

In Ayurveda two types of Gokhru are used, that is Bada and Chota Gokhru. It consists of dried and fully ripen fruits of *Pedalium murex* Linn. (Bada gokaru) belonging to family Pedaliaceae and *Tribulus terrestris* Linn. (chota gokaru) belonging to family Zygophyllaceae.

Synonyms:

Negalu, Neringil, Lahan gokahru, Betha gokharu

Chemical constituents:

- Fruit : Alkaloids 3.5%–5%, stable oil, aromatic oil, resins, glycosides, carbohydrates, saponins and triterpenoids.
- Stem : Saponins, herman, phytosterols, tannins and carbohydrates.
- Root : Reducing sugars, phenolic compounds, saponins, xanthoproteins, alkaloids, triterpenoids and flavonoids.
- Leaves : Flavonoids, alkaloids, steroids, resins, saponins and proteins.

Therapeutic Uses:

T. terrestris is very valued for the broad range of properties such as asthma, cough, splenetic diseases, heart disorders, aching of limbs, striating urinary stones, aphrodisiac, anti-inflammatory, anthelmintic, diuretic and used in enemas.

The leaves are used in pharmaceutical industry for preparation of herbal tonic, it plays important role indigestive problems, to increase spermatozoa, to enhance sexual desire and treat urinary tract infection.

Ayurvedic Herb: Gokhru

OVERVIEW OF AN INDIAN AYURVEDIC HERB: GOKHRU

The fruits are used for coughs, spermatorrhoea, scabies, anemia, ophthalmic and haemostatic. The fruit infusion is exclusively used for kidney disease.

The stem is astringent and is used in gonorrhea. Ash of the whole plant is used for external application in rheumatoid arthritis and roots are reported to be aperients, demulcent and used in the preparation of tonics.

T. terrestris products are easily prepared from roots, shoots, seeds and flowers which are the main source for raising a profitable standard of the pharmaceutical laboratory.

Genetic teeth: Regeneration

GENETIC TEETH: REGENERATION OF LOST TEETH

A hypothesized fairy tale from Japan says that, tooth fairy is a welcome guest for child who has lost teeth. Not only the fairy leaves a gift under the pillow but the child can be assured of having a new tooth in few months. The same cannot be said to the adult who has lost teeth. In human body genes control everything. Certain segments of DNA are responsible for individual characteristics whereas some control multiple aspects of body. Like nails, horns, teeth are ectodermic in origin. Tooth morphogenesis is regulated by signal transduction network which involve interaction between the epithelial and mesenchymal around bone morphogenetic protein (BMP).

According to the research article published in Journal Science Advances, genes are enough to tell body to grow new teeth. In an individual the number of teeth is strictly controlled whereas in 1% of individuals the increase and decrease of the usual number of teeth is called as tooth agenesis. Genes responsible for tooth agenesis are Msx1, RunX2, ectodysplasin A.

Studies done by Kyoto University and University of Fukui offer some hopes as the teeth reports that an antibody for 1 gene that is Uterine Sensitization associated gene-1 or USAG-1 can stimulate the tooth regrowth in mice with tooth agenesis, a congenital condition. It was found that blocking the USAG-1 gene caused increase in the activity of BMP as it is responsible for adult teeth growth in 1st place. In the study with mice increasing BMP's activity caused them to regrow missing teeth. USAG-1 gene is a bifunctional protein that antagonize BMP and Wnt as these are two signaling molecule essential for tooth regrowth and development.

Genetic teeth: Regeneration

GENETIC TEETH: REGENERATION OF LOST TEETH

USAG-1 gene interacts with BMP and Wnt which results in several antibodies which show poor survival rate in mice for whole body growth. But one promising antibody disrupted the interaction of USAG-1 and BMP.

Experiments with this antibody revealed that BMP signaling is essential for determining the number of teeth in mice. A single administration of antibody was enough to generate whole teeth and subsequent experiment showed same benefits in ferrets. Ferrets teeth mostly resemble human teeth. Ferrets are diphyodont animals with similar dental pattern to humans. Analysis of mice clarified the genetic factor and molecular and pathological mechanisms for this condition. BMP is also important in supernummary tooth formation which was demonstrated by transplantation of incisors explants supplemented with BMP7 in USAG-1+/- mice induced development of supernummary teeth.

Clinical trials are still going on. The investigation aimed to generate and use monoclonal anti-USAG-antibody rather than genetic inhibition for local arrest and recovery of tooth development. It provides a new therapeutic framework for clinical problems that can currently only be resolved by artificial measures. It was showed that conventional tissue engineering is not suitable for tooth regeneration rather the cell free molecular therapy is effective for wide range of congenital tooth agenesis.

The World Without India

THE WORLD WITHOUT INDIA

"Jaha Daal Daal Par Sone ki Chidiya Karti hai Basera Woh Bharat Desh Hai Mera"

As we know our country India plays a major role to run the world. If India would not be the part of the World, we won't be able to see the Great Scientists such as Newton, Einstein, Edison, etc. Also the Great Inventions like Gravity, Theory of Relativity, Light Bulb, etc. would be unknown for us. Without India it was not possible to reach Space. Concept of zero was presented by Aryabhatta from India.

If there was no invention of zero, the whole world was unknown about the algebra, arithmetic and most importantly there was no invention like computer because computer understands binary language and can we imagine world without computer? Also the Himalaya Mountains plays an important role which runs 19 Rivers which Supplies water to Whole Asia Continent, also Himalayan Mountain contains 1748 Medicinal Herbs which cures most of diseases such as Malaria.

70% Spices of world comes from India and also has the power of Ayurveda which is used from 1000 BC. Plastic Surgery was first founded by India, by Indian Scientist Sushruta, and this invention has cure lots of people who suffered from acid attacks, fire burn. The Wireless Technology was first founded by an Indian Scientist Jagdish Bose which made communication easy. Also Yoga was founded in India and now the whole world accepts this therapy, because it cures diseases like Heart Disease, Cancer, Diabetes, etc. and when it comes to mental peace meditation is the best way.

The Taste of Success

The Taste of Success

“Once upon a time there was a man who, was in search for his spiritual enlightenment, decided to climb a high mountain dressed only in his normal clothes and to spend the rest of his life there meditating.

He realized at once that one change of clothing wouldn't be enough because his clothes soon became dirty. He came down the mountain, went to the nearest village and begged them to give him some more clothes. Since they all knew he was a man in search of enlightenment, they gave him a new pair of trousers and a new shirt.

The man thanked them and went back up to the hermitage he was building on top of the mountain. He spent his nights building the walls and his days in meditation. He ate the fruit from the trees, and drank the water from a nearby spring.

A month later, he discovered that a mouse was nibbling away at his spare set of clothes, which he had left out to dry. Since he wanted to concentrate exclusively on his spiritual duties, he went down to the village again and asked them to get him a cat. The villagers, who respected his search for spiritual enlightenment, found him a cat.

Seven days later, the cat was close to starvation because it could not live on fruit alone and there were no more mice around. The man went back to the village in search of milk. The villagers knew that the milk was not for him and that he was surviving without eating anything apart from what Nature provided, and so, once again, they helped him.

The Taste of Success

The Taste of Success

The cat soon finished the milk, and the man asked the villagers to lend him a cow. Since the cow gave more milk than the cat could drink, the man started drinking it too, so as not to waste it. Soon, by dint of breathing good mountain air, eating fruit, meditating, drinking milk, and doing exercise, he was transformed into a very handsome specimen indeed.

A young woman, who had gone up the mountain in search of a sheep, fell in love with him and persuaded him that he needed a wife to take care of the household duties, leaving him free to meditate in peace.

Three years later, the man was married with two children, three cows, and an orchard and was running a meditation centre, with a long waiting list of people wanting to visit the 'Temple of Eternal Youth'. When someone asked him how it had all started, he said:

'I arrived here with only two items of clothing, and when I had been here for two weeks, a mouse started nibbling one of them and...'

But no one was interested in the end of the story; they were sure that he was simply an astute businessman trying to invent a legend that would justify him putting up the price of a stay at the temple still more.

Can Obsession Be A Disorder?

Can Obsession Be A Disorder?

Mental health or psychological health is the most "Trending" topic now a day.

But what it actually means is

In simple words mental health refers to cognitive behavioral and emotional well-being. It is all about how people think, feel and behave and not just about the absence of mental disorder. But yes, certain factors like history of mental disorder in family, stressful life situations, ongoing (chronic) medical conditions can disrupt the medical health and cause mental disorder. Out of such disorders one of well-known disorder is "**OBSESSIVE COMPULSIVE DISORDER**"

Obsessive compulsive disorder is nothing but an anxiety disorder in which obsessions are recurrent thoughts, image, or impulses that are intrusive and unwanted. While compulsions are time consuming and distressing repetitive rituals.

Symptoms of OCD- (Obsessive):

- 1) Fear of contamination or dirt.
- 2) Doubting and having difficulty in tolerating uncertainty
- 3) Needing things orderly and symmetrical.
- 4) Aggressive or horrific thoughts about losing control and harming yourself and others.
- 5) Unwanted thoughts including aggression or sexual or religious subjects.

Can Obsession Be A Disorder?

Can Obsession Be A Disorder?

Symptoms of OCD-(compulsive):

- 1) Washing and cleaning
- 2) Checking
- 3) Counting
- 4) Orderliness
- 5) Following a strict routine
- 6) Demanding reassurance

Treatment for OCD-

- 1) Psychological treatment such as cognitive behavior therapy
- 2) Anxiety management techniques
- 3) Support groups and education
- 4) Medications

Cytokines Storm in Covid-19

CYTOKINE STORM IN COVID-19

What is a cytokine storm?

A cytokine storm, also called hypercytokinemia, is a physiological reaction in humans and other animals in which the innate immune system causes an uncontrolled and excessive release of pro-inflammatory signaling molecules called cytokines.

Reasons for cytokine storms

1. Genetic Syndromes
2. Infection
3. Autoimmune disease
4. COVID-19

Cytokine Storms Syndrome Symptoms

Fevers and chills, Fatigue, Swelling of extremities, Nausea and vomiting, Muscle and joint aches, Headache, Rash, Cough, Shortness of breath, Rapid breathing, Seizures, Tremor, Difficulty coordinating movements, Confusion and hallucinations etc.

COVID-19 and Cytokine Storm

1. One of the differences between a mild Covid-19 infection and a fatal affliction could be a chaotic response by the body's own immune system to the virus, known as a cytokine storm.
2. Studies have suggested that the condition is because the body doesn't understand how to respond to the relatively new Covid-19 infection and triggers for cytokine production have been seen to be all over the place in patients and immune systems in the most severe cases mount a defense that is more likely to kill pathogens that are not viruses.

Cytokine storm in Covid-19

CYTOKINE STORM IN COVID-19

3. Cytokine storm appears to play a direct role in determining the severity of SARS-CoV-2. One of the most notable clinical conditions that are associated with cytokine storms includes acute respiratory distress syndrome (ARDS), which has accounted for a significant number of deaths from SARS-CoV-2, in her study.

4. Experts believe that if the Covid-19 patient gets severe Cytokine Storm and fails to get treatment in time, it can result in death. The deaths of Covid-19 patients due to multiple organ failure are believed to be caused by Cytokine Storm. Though the Cytokine are part of the Human immune response and help protect the body from various types of infection and diseases, in some Covid-19 patients, they are believed to begin to grow uncontrollably and attack the cells themselves, severely affecting the patient's body. According to the experts, Covid-19 has the potential to make the patient's own immune system his biggest enemy.

Treatments

Timely and effective treatment is essential for CRS, as the symptoms can rapidly worsen and become severe.

Doctors will use medication to reduce inflammation safely in people with CRS. Some drugs will target specific cytokines. For example, tocilizumab (Actemra) and siltuximab (Sylvant) reduce the action of the cytokine interleukin-6.

Cytokines storm In Covid-19

CYTOKINE STORM IN COVID-19

Another option is corticosteroids. These drugs reduce inflammation without targeting a specific cytokine. However, they suppress the immune system and can interfere with cancer treatment.

These treatments may include:

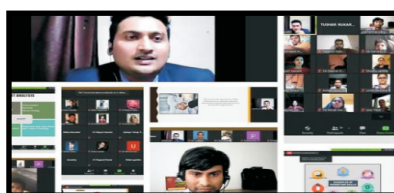

1. Intravenous fluids
2. Oxygen or ventilator support
3. Medicines to support heart function
4. Blood product transfusions
5. Medicine or dialysis for the kidneys

WE PHARMACIST'S.....

Mr. Rehan Khan
T.Y.B.Pharmacy
Div-A

We Pharmacists are for the people,
Serving the nation till feeble,
With doctors,
like thread with a needle.
Protecting everyone from evil,
Rich or poor,
treating everyone equal,
Dealing with drugs, for us is legal.
We care for the people
since they're fetal,
We try to save, even if they're lethal,
When poisoned, with a treacle.
We are balance, offering, practical
magic, promise, longevity,
generosity, and intelligence as
Symbolized by the tree of maple,
We consider ourselves dignified
regal,
Working day and night, for the
people to sleep peaceful.

MEDICINE...

A row of bottles on my shelf
Cause me to analyze myself
One yellow pill I hope to pop
Goes to my heart so it won't stop

A little white one that I take
Goes to my hands so they won't shake
The blue ones that I use a lot
Tell me I'm happy when I'm not

The purple one goes to my brain
And tells me that I have no pain
The capsules tell me not to sneeze
Or cough, or choke or even wheeze

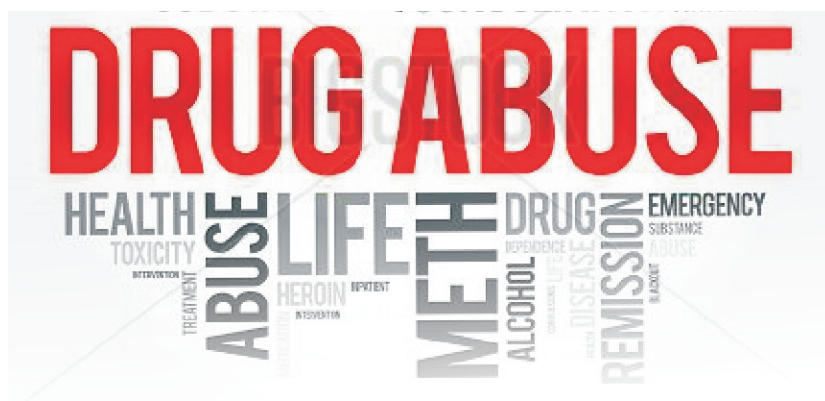

The red ones, smallest of them all
Go to my blood so I won't fall
The orange ones, oh so big and bright
Stop my leg cramps in the night

Mr. Prathamesh
Sawant

Pharmacy

Such an array of brilliant pills
helping to cure all kinds of ills
But what I'd really like to know
Is what tells each one where to go

Drug Abuse

_ Nowadays, I walk in the mirror & see,
 What drugs & potions have made me.
 My bones feel thicker than wood,
 My vision's getting dizzier than it should.
 I can see my bones & veins through my skin,
 & yet, I need to swallow all the death pills.
 I can see my heart beat throughout my chest,
 Oh Such pain, Such craziness, Such a mess.
 I can feel the terror coming closer,
 I can feel the shadow getting darker.
 & If anyone talks about illegal possession,
 I, just, bend the law & win in opposition.
 But this addiction has gone too far,
 Damaging, the lungs, the heart.
 Our death is ruled an overdose,
 So our story book is closed.
 With our legacy, sad & undone,
 Drugs leads to depression for everyone.
 Some smalltime pleasure, worth our organs,
 Daily problems, all due to Drugs.

जानने लगा हूँ.....

क्यों स्त्री ही जन्म देती है,
क्योंकि उसी में शक्ति है उस दर्द को सहने की ।
जानने लगा हूँ

क्यों स्त्री अपना घर छोड़कर किसी पराए घर जाती है,
क्योंकि उसी में शक्ति है पेहेले से शुरुआत करनेकी ।
जानने लगा हूँ...

क्यों स्त्री को सदा सुहागन रहो का आशीर्वाद दिया जाता है,
क्योंकि उसी में शक्ति है यम' से पति के प्राण लाने की।
जानने लगा हूँ

क्यों लोग कहते हे स्त्री शिक्षित तो विकास निश्चित,
क्योंकि उसी में शक्ति है पुरे समाज को बदलने की ।

जानने लगा हूँ
क्यों स्त्री इक शब्द नहीं शक्ती हूँ,
क्योंकि इस शक्ति के बिना शिव भी अधूरे है।

देतात 'ते' च उडण्याचे
धाडस अन् आसरा...

झेपेनंतरही पाखरांना होतो
गुरु पाठी असल्याचा भास..
बघता बघता चटकन संपतो
सही ते ऑटोग्राफ पर्यंतचा प्रवास..

स्मरणात उरतो मग फक्त
आयुष्यातील वळणांचा घाट..
दिशा जर 'ती' चुकली असता
मग राहते अधुरी वाट.. गुरुविण..

मी धोंडीराम शिवा कौशल, माझी मुलगी ऋतुजा कौशल ही आपल्या कॉलेजमध्ये डी. फार्मसी हा कोर्स शिकत होती. तिने डी. फार्मसीमध्ये प्रथम श्रेणी मिळवत चांगले यश संपादन केले. आपल्या कॉलेजचे शिस्तीचे पालन मुलामुलींकडून होतेय याचे मला खूप कौतुक वाटले. प्रशस्त मैदान, विविध सांस्कृतिक कार्यक्रम यामुळे विद्यार्थ्यांना त्यांच्यात असणाऱ्या सुप्त गुणास वाव देण्याचे काम करता हे उल्लेखनीय आहे. आपल्या कॉलेजची कडक शिस्तच विद्यार्थ्यांच्या शैक्षणिक प्रगतीस गतिमान करते यात शंका नाही.

श्री. धोंडीराम कौशल

माझा मुलगा साहिल संतोष घाडी आपल्या कॉलेजमध्ये गेली २ वर्ष बी फार्मसी या कोर्समध्ये शिकत होता आणि चांगल्या गुणांनी उत्तीर्णही झाला. यासाठी प्रथम कॉलेजचे मनापासून आभार. कॉलेजच्या सर्व शिक्षकांनी सर्वच मुलांवर मेहनत घेऊन हे यश मिळवले त्याबद्दल त्यांचे अभिनंदन. माझ्या मुलाला मिळालेले मार्गदर्शन आणि शिक्षणाचा उत्कृष्ट दर्जा त्याच्या पुढील आयुष्यात नेहमीच उपयोगाचे ठरेल याची मला खात्री आहे. तसेच कॉलेजचे पोषक वातावरण मुलांना योग्य ते मार्गदर्शन करण्यासाठी, त्यांच्यावर चांगले संस्कार करण्यासाठी पात्र ठरले. अश्या वातावरणात शिकून मुलं पुढे नक्कीच त्यांचे उज्वल भविष्य घडवतील. कॉलेजने घेतलेले कष्ट नक्कीच दिसून येत आहेत. पुन्हा एकदा माझ्याकडून कॉलेजला हार्दिक अभिनंदन आणि मनापासून आभार.

श्री. संतोष पुंडलिक घाडी

"Law and order are the medicine of the
body politic and
when the body politic gets sick medicine
must be administered"

- Dr. B. R. Ambedkar.

It is a pleasure to learn that Yashwantrao
Bhonsale College of pharmacy Sawantwadi
is releasing the college magazine
'Pharmankur'.

College magazine are sources of inspiration
for students and faculty to express their
creativity. These act as springs for nurturing of
talents and future growth. Yashwantrao
Bhonsale College of Pharmacy Sawantwadi
has a long and commendable tradition of
emerging talent and supporting creativity.

My best wishes to every member of
pharmacy staff and team of 'Pharmankur' for
making 'Pharmankur' become the much
awaited house magazine of Indian
Pharmaceutical fraternity.

I wish the best for your endeavors.

"The best and most efficient pharmacy is
within your own." - Robert Peale.

All the very best!!!

सावंतवाडी शहरातील भोसले नॉलेज सिटी म्हणजे विद्यापीठच आहे. इथे सुरु झालेल्या विविध शैक्षणिक कोर्सेस मुळे सिंधुदुर्ग जिल्ह्यातील हजारो विद्यार्थ्यांना घराजवळ, उत्तम शिक्षणाची संधी उपलब्ध झाली आहे. तसेच अनेक अभ्यासू, गुणवंत, शिकवण्याची मनापासून आवड असणाऱ्या तरुणांना नोकरीची संधी उपलब्ध झाली आहे. या संस्थेतील संस्थापक, व्यवस्थापन समिती सदस्य तळमळीने विद्यार्थ्यांच्या उज्वल भविष्यासाठी नवनवीन सुविधा उपलब्ध करून देत असतात.

या संस्थेला मनःपूर्वक शुभेच्छा.

वंदना करंबेळकर
निरामय विकास केंद्र, कोलगाव
सावंतवाडी.

सावंतवाडी येथील यशवंतराव भोसले कॉलेज ऑफ फार्मसीमध्ये मला २६ फेब्रुवारी २०१८ रोजी ग्राहक संरक्षण कायदा-१९८६ या विषयावर मार्गदर्शन करण्याची संधी मिळाली. त्यापूर्वी मला कॉलेजचे नाव ऐकून माहीत होते .या निमित्ताने तिथे जाण्याचा योग आला. प्रत्यक्ष कॅम्पसमध्ये प्रवेश केल्यानंतर आपण नक्की कुठे आलो आहोत हेच थोडा वेळ विसरलो. तेथील एकूण वातावरण पाहून खूप प्रसन्न वाटले. बाहेरील परिसर आणि महाविद्यालयाच्या आतील वातावरण हे दोन्ही एकमेकांना पूरक वाटले. महाविद्यालय नव्याने सुरू झाले असून सुद्धा त्या ठिकाणी असणाऱ्या एकूण सुविधा खरोखरच लक्षवेधी आहेत. विद्यार्थ्यांच्या गरजा लक्षात घेऊन आणि ज्ञानपूरक सुविधा आहेत.

निसर्गाच्या सानिध्यात असणारे महाविद्यालय, येथील विद्यार्थी, शिक्षक-शिक्षकेतर कर्मचारी आणि महाविद्यालयाचे प्राचार्य मा.डॉ.जगताप सर यांना भेटून खूप बरे वाटले. या महाविद्यालयाने थोड्या कालावधीमध्ये शैक्षणिक क्षेत्रामध्ये उंच झेप घेऊन विविध उपक्रम राबवून आपले नाव उज्वल केले आहे. आपल्या भोसले शैक्षणिक संकुलामध्ये अद्यावत ज्ञानशाखा उपलब्ध करून दिलेल्या आहेत. महाविद्यालयाचे एकूणच व्यवस्थापन या सगळ्यांच्या पाठीमागे भक्कमपणे उभे आहे. त्यामुळेच अल्प काळातही या महाविद्यालयाने संपूर्ण जिल्ह्यामध्ये लक्ष वेधून घेतले आहे. या महाविद्यालयाच्या रूपाने सुंदरवाडीच्या वैभवात भर घातलेली आहे.

आपल्या शैक्षणिक संकुलाचा ज्ञानरूपी बहर
सतत फुलत राहो हीच सदिच्छा !

प्रा. श्री. एस. एन. पाटील
इतिहास विभाग प्रमुख, आनंदीबाई रावराणे महाविद्यालय वैभववाडी.

विद्यादान हेच सर्वश्रेष्ठ दान आहे असे आपली संस्कृती सांगते. सावंतवाडी म्हणजे अनेक बुद्धिवंत, अभ्यासकांची नगरी असे असतानाही अनेक वर्षांपासून अनेक व्यवसाय तांत्रिक शिक्षणाच्या सुविधा उपलब्ध नसल्याने अनेक विद्यार्थ्यांना पुणे मुंबई येथे जाऊनच शिक्षण घ्यावे लागत असे. अशा परिस्थिती श्री.अच्युत भोसले आणि त्यांच्या परिवारांनी श्री यशवंतराव भोसले यांचे नावाने शैक्षणिक संकुल प्रारंभ करून जिल्ह्यात तंत्र शिक्षण, औषधी निर्माण शास्त्राची बहुमोल सुविधा विद्यार्थ्यांसाठी सुरु केली. श्री यशवंतराव भोसले शैक्षणिक संकुल निसर्गरम्य अशा भागात असून केजी पासून, औषधी निर्माण पदविका - पदवी, तंत्रशिक्षण पदविका अभ्यासक्रम यशस्वी रित्या सुरु केली.

महाविद्यालयांत तज्ञ प्राध्यापक वर्ग, ग्रंथालय, यंत्र - उपकरणांनी संपन्न प्रयोगशाळा, वसतिगृह सर्व सुविधा उपलब्ध असून संस्था उत्तरोत्तर प्रगतीपथावर कार्यरत आहे.

त्याशिवाय परिसरातील अनेक गरजू लोकांना रोजगार सुद्धा उपलब्ध झालेला आहे. संस्थेद्वारे शिक्षनाबरोबरच अनेक सामाजिक उपक्रम सुद्धा आयोजित केले जातात.

भविष्यात हि संस्था उत्तरोत्तर प्रगति करेलच यासाठी धन्वन्तरि चरणी प्रार्थना.

डॉ. दीपक मधुकर तुपकर
बी.ए.एम.एस.एम.ए. (संस्कृत-जैनशास्त्र-समाजशास्त्र)

ALUMNI MESSAGE

YBCP has provided me various opportunities for developing my professional skill and qualities by encouraging to participate and organizing various events. I am thankful to such a cooperative teaching and non teaching staff for their guidance and support. I am very grateful to be the part of such a educational friendly institution.

**Mr. Siddhesh
Rajesh Gosavi**
MBA, NIPER Hyderabad

Along with the academics, the practical experience is very much important for the student in order to meet the demand of the corporate world. YBCP is equipped with various equipment and instrument which helped me a lot in gaining the practical as well as academic knowledge. I am blessed to be the part of such institution.

**Mr. Vidur
Vithoba Bhogate**
PGDP, IIP Mumbai Govt.

I am thankful to collage for their continuous efforts and support. I gained excellent academic experience. I cherish every moment spent at BKC. My graduation at BKC has been very interesting and awesome journey. The college really cares about its members. It is a place of civility, friendship and good cheer.

Ms. Sheetal Sadguru Samant

KLE COP, Belagavi.

Alumni Message

ALUMNI MESSAGE

It gives me great pleasure to be an alumni of this institution YBCOP. The four years of graduation life has taught me so much, much beyond confines of the curriculum. I am thankful to all faculty members of the college for their continuous efforts and support. Apart from excellent academic experience, I am also gained the benefits of being President of Student Council Committee which made me a better individual. Teamwork, leadership skills, managing responsibilities, communication skills came to us by participating in various Events, quiz competitions, youth festivals, paper and poster presentations which YBCOP strongly encourages. All I want to say is that I got amazing memories for life from YBCOP and yes I am proud to be a YBCOPian. Thanks to YBCOP for shaping and sharpening us into better Pharma Professionals. I extend my gratitude to entire family of YBCOP and Best wishes!!!

Ms. Sanyuja Satish Nikam
M.Pharm.
(Pharmaceutical Chemistry)
GCP, Karad, Maharashtra.

Mr. Sagar Lad
Medical Representative
Alembic Pharmaceuticals

I'm very glad because I'm from 1st batch of d pharmacy in YBCP. I'm very thankful to the entire college staff for being a part of my beautiful journey. Thanks to our teaching staff for giving us knowledge about practical as well as academics. I gained too many amazing unforgettable memories from YBCP.

It was a great experience for me as a student of YBCP. I wish YBCP & all YBCPians, All the Best for their bright future.

ALUMNI MESSAGE

Ms. Gauri Dhuri
Pharmacist, Healthify
Medical Store
Candolim, Goa

I feel very proud to be a part of YBCP family. YBCP has taught me the professionalism, discipline and practical skills which are very important for my personal and professional development in future. Also I feel very thankful towards our college for providing us various opportunities to represent our skills by organizing various events. I am very grateful towards our teaching faculty for improving our Knowledge and guiding us in solving our difficulties at every step.

I'm from very 1st batch of D Pharmacy from YBCP and I'm very grateful for that. Past 2years were the bestest part of my life because this institute taught me so many good things which I don't heard never before and lots of memories with all my great teachers and beloved friends. In YBCP I had learned how to behave in a professional way? How to represent yourself in any competition?. I feel so lucky to became a part of YBCP.

It was a great experience for me as a student of YBCP. I wish YBCP & all YBCPians, All the Best for their bright future.

Ms. Latika Parulekar.
B. Pharmacy
YBCP, Sawantwadi

The journey in YBCP as a diploma student was amazing and unforgettable. I feel blessed to be a student of such reputed Institute. YBCP has taught me so many things right from self-confidence to professionalism. I am thankful to all teachers and non-teaching staff for bringing out best in me and also thanks a lot to whole Bhonsale Knowledge City for always being supportive and helpful. And I feel privileged to be a part of YBCP again for B. Pharm studies.

I have a great journey with YBCP, my two years are just a great experience. The teacher are always supportive and motivate all the time. The whole campus give the knowledge about daily life. Thanks to YBCP for giving me such great experience and unforgettable memories. It was a great experience for me as a student of YBCP. I wish YBCP & all YBCPians, All the Best for their bright future.
